ROGER WILCO IMAGING / PRIME ROGUE INC.

RWI-SITREP-022 — New Zealand Baseline — REDACTED PAVLOVA (Capability Test)

AUTOMATED GEOGRAPHIC COVERAGE TEST — NOT AN ANALYST-VERIFIED INTELLIGENCE FINDING

data/geo-nz/2026-10-30/manifest.json

Window: 2026-10-28T21:18:35+00:00 to 2026-10-30T21:18:35+00:00
Monitored sites: 12. Site passes: 9. Usable: 7. Sensor breakdown: {'Sentinel-2 L2A': 7, 'Sentinel-1 RTC': 2}.
Sites with collection errors: 0. FIRMS hits assigned across site boxes: 0 (overlapping boxes may duplicate detections).

Coverage and analytic limitations

This test demonstrates that geography is configured and reports can be generated from available manifest files. It does not establish that every installation, date, satellite, or flight was observed. Lack of detections is not proof of inactivity. Aircraft observations require separately generated ADS-B archives; these PDF summaries make no flight claims. Seasonal conditions, cloud cover, clipping and industrial heat require analyst review.
New Zealand codename REDACTED PAVLOVA is humour, not a security classification or official call sign.
